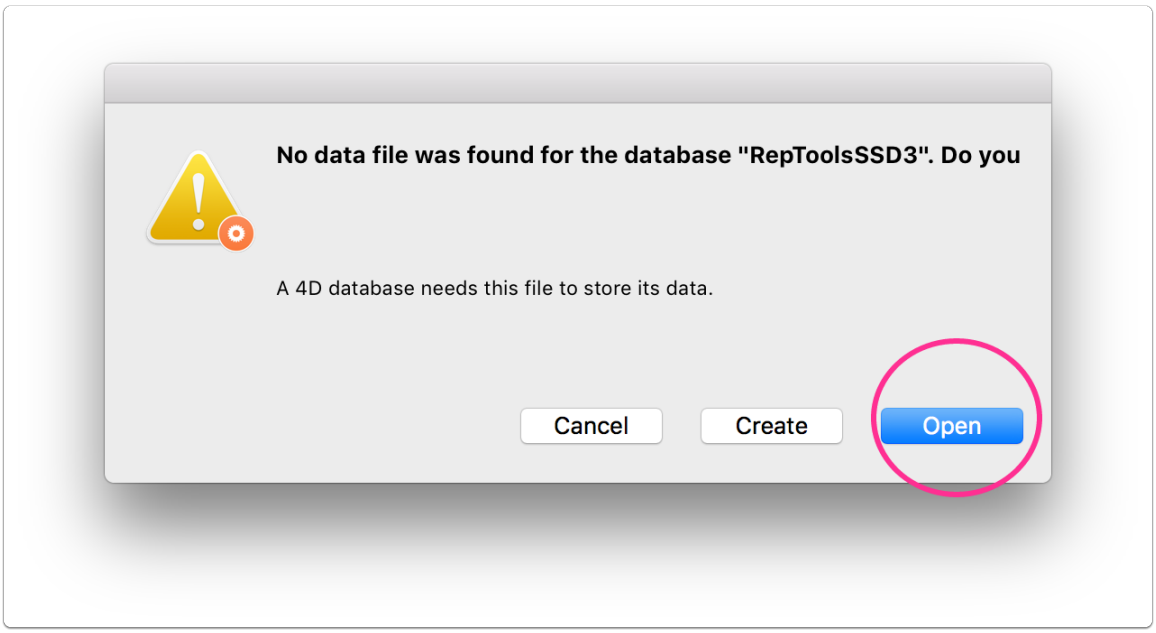
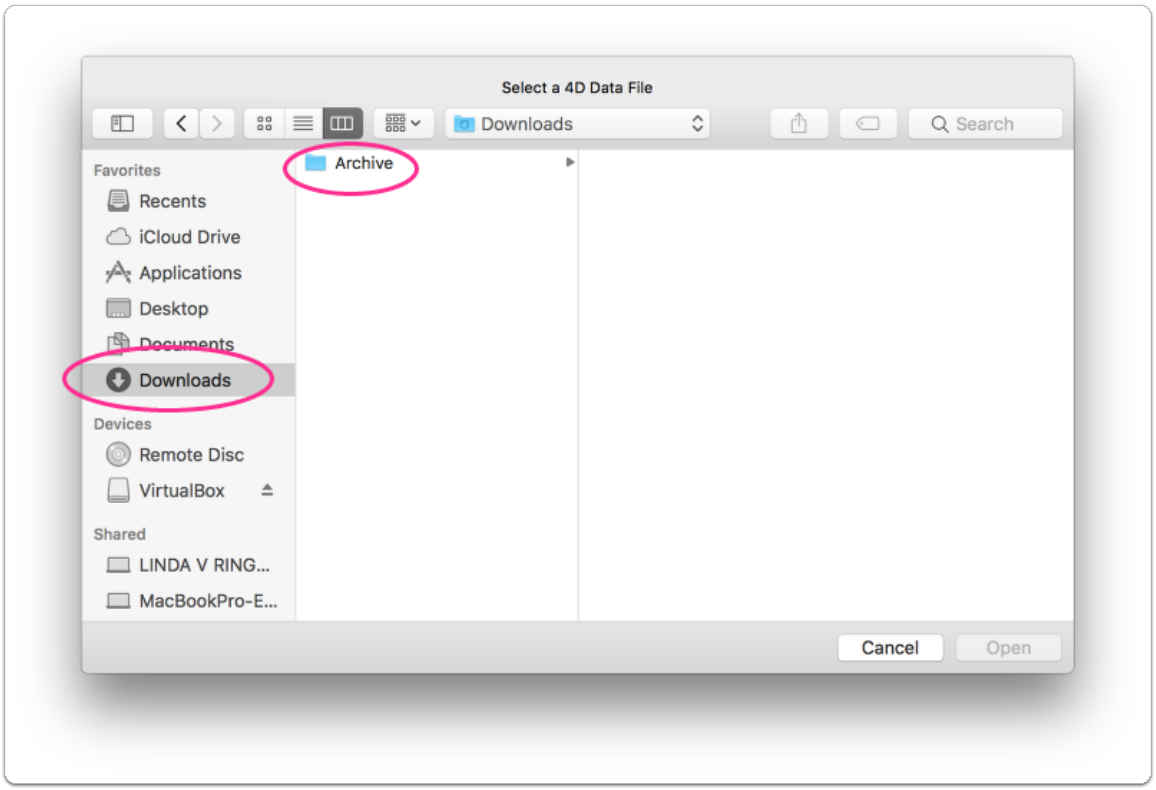
How to select RepToolsSSD3 data file

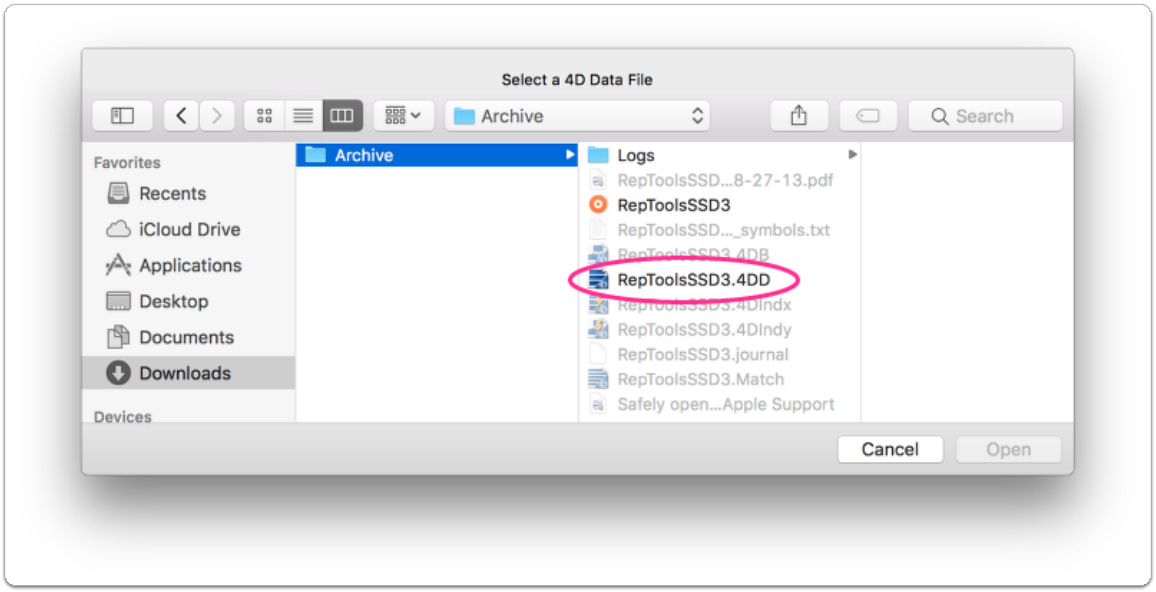
1. No data file was found for the database "RepToolsSSD3." Clik the blue Open button.

This is the error message if no data file was found.



2. Assuming that RepTools is in the Downloads folder, click on it. Then click on the "Archive" folder.



3. Select the "RepToolsSSD3.4DD" file.


This will launch RepToolsSSD3. From now on RepTools will remember where its data file is.
